Horizontally designed device with big front door for easy charging. All operation and control keys on front panel.

Pull-out basket, size 100 x 100 cms, to be charged with screen frames, squeegees and other small parts.

Various washing programs, according to the degree of pollution of the items to be washed. Control lamps indicate the individual steps of operation.

Rotating nozzle arms spray the dirty items from both sides (top and bottom) under high pressure. A highly efficient pumping system supplies the rotating arms with solvents. During washing, the solvents are being pre-filtered.

An exhaust air fan starts to work immediately after washing. The air tubes are closed by flaps during washing procedure.

Container on left side of washer collects the solvents and filters them.
